PROJECTS

Nico's Shop

- This simple E-commerce application allows a user to look for items and add them to a shopping cart; once logged in he can proceed with payment and complete the order. The app also has an admin portal that allows to manage users and products by adding, updating and removing them
- Built with React, NodeJS, MongoDB, Redux, Express, JWT
- Link to repo: <https://github.com/Nico749/react-shopping-cart>
- Link to walkthrough videos => User:
<https://drive.google.com/file/d/18hbYqiJbBphxTcxQ9gwVXGTzIKCwPKQV/view>
Admin: <https://drive.google.com/file/d/1LAiwQHxgq7AkFBGwfSbF-uLGao-uTm8D/view>

Find The Music

- The application allows an user to search for a city and displays the map pointing at that location and a list of events taking place in the area
- Built with HTML, CSS (BULMA library), JS, Third party APIs
- Link to repo: https://github.com/Nico749/Find_The_Music
- Link to the project: <https://findthemusic.herokuapp.com>
