

Nico Pasqualini

+61 0494196490 • Melbourne, Victoria • Mail: pasqualininic@gmail.com

After graduating from a coding boot camp, I developed a strong passion for tackling new challenges and continuously expanding my skill set. With a background in finance and economics, I bring analytical thinking and financial acumen, along with strong problem-solving, organizational, and adaptability skills. I consider myself a quick learner, adaptable team player, and effective communicator with a strong work ethic.

KEY SKILLS

Reporting & Insights | Data Maintenance | Data Quality Management | Problem Solving | Performance Metrics Evaluation | Data Visualization | Google Analytics & Tag Manager | BigQuery | Google Cloud Platform | Google Ad Manager | Python | SQL | Data Pipelines | API Integration | Cloud Functions | Agile Methodologies | Financial Analysis | Organizational Efficiency Optimization | Stakeholder Collaboration | Communication & Reporting | Change Management | Critical Thinking | Process Automation | Dashboard Development | Cross-Functional Collaboration

EXPERIENCE

Data Analyst

November 2022 – Current

News Perform (News Corp Australia)

- Conduct impartial evaluations of internal processes to identify inefficiencies and implement targeted operational improvements.
- Managed a team focused on driving subscription growth through optimisation and data-driven strategies.
- Design dashboards and reporting solutions that translate complex datasets into actionable business insights.
- Deliver analysis across digital and subscription metrics to identify trends, improve retention, and support growth initiatives.
- Develop and maintain SQL queries for extracting, transforming, and analysing large-scale datasets.
- Build and optimise data pipelines to streamline data flow between source systems and reporting layers.

- Integrate APIs and third-party platforms to centralise data sources and improve reporting efficiency.
- Implement data quality controls and governance frameworks to ensure reporting accuracy and consistency.
- Leverage tools including Google Analytics, BigQuery, Google Tag Manager, and Python for analytics, automation, and performance evaluation.
- Provide strategic recommendations to optimise platforms, enhance data processes, and support business objectives.
- Collaborate with cross-functional teams in Agile environments to deliver data-driven solutions and improve workflows.
- Present insights and performance findings to stakeholders and senior management to support strategic decision-making.

Data Analyst Intern

September 2022 – November 2022

News Perform (News Corp Australia)

- Develop, test, and troubleshoot Google Tag Manager tags to ensure accurate tracking and reliable data collection across digital platforms.
- Design, build, and maintain interactive dashboards to visualise key performance metrics and enable self-serve reporting for stakeholders.
- Create and generate detailed Google Analytics reports and explorations to support data analysis, performance monitoring, and data-driven decision-making across the data department.

Retail Sales Assistant

December 2019 – July 2022

ItalianChef

- Manage customer care responsibilities
- Collaborate with the HR team during the hiring process, assisting with candidate evaluations and staff duty allocations.
